DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Applicant required to pick ONE of the species below from EACH group:

Umbrella Structure

I) FIG. 1

II) FIG. 16

Connection Between Shaft Segments

A) FIG. 9

B) FIG. 10

C) FIG. 11-12

D) FIG. 13

E) FIG. 14

Position Limiting Hinge

F) that shown in FIG. 1

G) FIG. 4

H) FIG. 5

J) FIG. 6

Develop-Fold Mechanism

K) that shown in FIG. 1

L) FIG. 2

M) FIG. 7-8

The species are independent or distinct because they are materially different.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from EACH group for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Danielle Jackson whose telephone number is (571) 272-2268. The examiner can normally be reached on Monday through Friday 8:30am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Dunn can be reached on (571) 272-6670. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
